

CUTTING & FOLDING MACHINE

FOR A MULTITUDE OF SHAPE IDEAS, INCLUDING THE MOST UNUSUAL

rev. 001088.2407.59

■ Cutting & folding machine

- Forming machine for Bologna pasta, farfalle in different sizes, maltagliati, cut orecchiette, etc.
- Maximum security and easy of use
- Sheet scrap grinding system with continuous transport

CUTTING & FOLDING MACHINE

Bologna pasta, farfalle in different sizes, maltagliati, cut orecchiette, etc. There is a wide choice of Bologna-style shapes, and maximum safety and easy-of-use are the hallmarks of this cutting/folding machine.

Main technical features:

- Sheet scrap grinding system with continuous transport into the kneading unit
- First, the thickness of the pasta sheets is determined using a pair of calibrating rollers and then cut to fit the chosen mould, all done without the surface drying out which is harmful to forming
- Maximum safety and easy-of-use are the hallmarks of this cutting/folding machine
- Mould timing is fast, simple and direct, without need for intervention in maximum security
- PLC to manage and store line parameters
